High-performance oxidant-free hair color For extra bright, shiny and lasting hair colors without ammonia, without ammonia-smell, non-oxidative and soft for hair. Color remains strong even after 10 shampoo. Technology It is remarkable technology making elumen a physical color, which means it works completely without oxidation, but still achieves spectacular and prolonged color results. Magnet effect a color process that obscures conventional technology: the Elumen magnet effect creates a new dimension of intensity and durability. Intensive Elumen pigments are physically drawn deep inside the hair where they are safely anchored to produce intensive and remarkably prolonged color results. Recovery effect More than just a color: the Elumen recovery effect creates impeccable brilliance and shines. Like an impure diamond, powdered areas of hair spread the light makes the hair appear stressed and dull. Elumen fills the pore areas in the hair and improves the hair structure to reflect light perfectly. How to use 1 PPARPARE Brushing Hair to Detangle. Hair should be dry or towel dry. Use Elumen Prepare after stressing/high lifting service or as a precolor treatment for damaged hair. 2 APPLICATION Prepare single or multiple shading formula in color bowl, Elumen Shade bottle, or Elumen mix bottle. Attach nozzles or brum attachment as necessary. Serve color on hair. 3 DEVELOPMENT TIME Process with heat for 20 minutes Process without heat for 30 minutes 4 WASH After processing is completed, rinse with water and shampoo twice with Elumen Wash. Towel dry thoroughly. 5 CARE Evenly saturated the hair with Goldwell Elumen Lock,camp through and process for 5 minutes. Rinse thoroughly and condition with Elumen Care of Elumen Treat. Main features for whom: For women Hair type: All types of Ingredients: Ammonia free, Peroxide free Own Warehouses Stock Products are ready for quick shipment Incredibly low prices The best possible price setting on market world news The latest beauty products You will receive a useful gift with your order 1 Choose an Elumen Hair Color. There are many different colors, including both natural and fashion, which you can choose from. Each color is characterized by letter and number combinations indicating different colors and underlying colors. Some of these color options include:[1] BB@all, meaning blue at any hair level (unnatural), NA@2, which means natural as at a hair level 2 (deep), GB@9, which means gold beige/brown on a hair level 9 (light). [2] 2 Buy Elumen Hair Color, Elumen Prepare and Elumen Lock. To paint your hair correctly, you need the Elumen Hair Color, which is oxidant-free, ammonia-free, and peroxide-free. You will also need Elumen Prepare, which improves the color's durability and intensity when it before painting. Finally, you must includes, which are applied to clothes to keep the color from the wash over time. You can also buy Elumen Clean if you want to easily remove dye stains from your skin. [3] 3 Washing and towel drying your hair. To prepare your hair for clothes, it was once or twice with your regular shampoo to remove the oil from your hair. Do not use or blow it dry afterwards with a hairdrecer. Instead, dry it in part with a towel. [4] 4 Fit Elumen on your hair. Inject some Elumen into your hands and run your hands through your partially dried hair. Continue to inject more into your hand and apply it to your hair until your hair feels uniformly smooth. It is not necessary to drive your hair into the Prepared Product. [5] 5 Section your hair. Especially if you have a lot of hair and/or you're clothing your whole head, it can be a good idea to separate your hair into sections. Use a combination to share your hair straight into the middle and also about your head from one side to the other. At this point, your hair should be divided into four equal sections. Turn and clip each one to ensure they remain divorced. [6] 1 Inject your Elumen Hair Color into a bowl. You may want to empty the whole contents of the bottle in the bowl if you have long hair and you clothe it all. [7] If you have shorter hair or just touch your color, inject 4 or 5 tablespoons (60-75 ml) into the bowl. [8] 2 Cover your shoulders and your working area to prevent stain. Wear an old t-shirt you don't care about and/or wear an old towel over your shoulders before applying the color. [9] Also lay out a towel on the counter where you will apply the color. This way you can set your products and materials on top of the towel to avoid the counter stains. 3 Use your glove or an applicator brush to apply the color. Sitting on some gloves and unclip one of your front portions of hair. Either reach your gloves hand in the bowl and scoop out of a glow of dye, or do it by dipping a applicator brush in the dye. Carefully cover your hair with the color by starting at the roots and working your way out to the tips. [10] When the section is completely covered in dye, move on to the next section. Continue this until the color is applied to all your hair. Apply carefully so that you don't get the color in your eyes or to fling the room; it stains pretty easy. If you color your hair multiple colors and want to keep the colors separate, cut sheets of foil between the different colored sections. If you dress your hair multiple colors and not separate them, the colors will mix together, which many find desirable and attractive. [11] 4 Pen and covered your hair. After you're done with the app, use clips to pin your hair close to your head. Then cover your hair completely in plastic or with a shower cap. [12] 5 Let the color process be processed for half an hour. Once your hair is covered, leave it alone for about 30 minutes processed it. The will best be processed at room temperature, or 68 degrees fahrenheit (20 degrees Celsius). [13] Only allow it to process for 20 minutes if you use a hairdryer. 6 Rinses and condition your hair. After half an hour, rinse the color out of your hair with cool water and then serve your regular conditioner. Let the conditioner sit on your hair for about 1 or 2 minutes, and then rinse it thoroughly with cool water and towel drying your hair. [14] 1 Apply Elumen Lock with your hands. Inject as much Elumen Lock as will fit into your palm. Use your hands to run the product through your hair and thoroughly cover it all. [15] 2 Wait 5 minutes and wash and condition your hair. Let Elumen Lock sit on your hair for five minutes so it can effectively protect your hair color. Shampoo your hair with your regular shampoo and rinse it out. Condition your hair with your regular conditioner and rinse it out as well. [16] Goldwell makes a shampoo product called Elumen Wash and a conditioning product called Elumen Treat that you can consider buying and using this part of the process. 3 Rub Elumen Clean on lead skin. Inject some Elumen Clean on a cotton ball and then rub it on any skin stained by the dye. If it's no different, you'll probably need to apply it to the tops of your ears. [17] 4 Wash your hair once a week to make the color last. While Elumen Hair Color often lasts longer than many other types of hair dye, exactly how long varies and depends on different factors, such as the specific dye and the health of your hair. To your hair color remains rich and alive for as long as possible, try to wash only your hair 1-2 times a week. Use dry shampoo in between washes to keep your hair from looking oily and dirty. [18] Add new question question to Do I need to be relieved in advance? It depends on what color you color your hair, and how dark your hair is. If you have dark hair and your clothes your hair pink, for example, you will need to bleach your hair in advance. Question Should I apply the lock after rinsing the color, or to shampoo the hair? Apply it to shampoo the hair. Question was I preparing before applying the color? Yes, you should. Do not forget the after treatment. Question is it OK to flush with water, no shampoo, every day? Yes, it's OK, but your hair will smell bad and the oils will increase from it, causing fatty hair. It will be a pain to brush, so it is recommended that you use shampoo. Question I'm allergic to sesame. Does this product have sesame as an ingredient? No! The ingredient list is: Water, Propylene carbonate, Alcohol Denat, Lax acid, PEG-9 Dimethicone, Xanthan Adhesive, Sodium Hydroxide, Flavour/Perfum, plus AZO Dye, which is modated by color.
